PROJECTS

Human Rights First DocDB, GitHub   October 2021 - November 2021

Application designed for non profit company to search for and bookmark documents.

- Successfully drafted up a data flow diagram showing the effect of Okta, a new technology, that was agreed upon by both the front and backend teams.
- Using Node.js and Express, collaborated with the backend engineers to implement 3+ GET requests for user profile data and CRUD operations on each of those endpoints.
- Completed all tasks using Agile methodology with a coordinated team of 40+ developers.

Trivia W/ Friends, GitHub | Deployed   October 2020 - November 2020

A trivia game that allows users to locally track their scores.

- Working remotely with a team of developers using Git reviewed and merged more than a dozen pull requests.
- Thoroughly researched Trivia API's documentation to not only get trivia questions and answers, but allow users to select difficulty, topic, and number of questions.
- Expanded CSS knowledge implementing animations into the Hi-Score page to make the application more engaging.
- Successfully pitched project direction and member roles for the team.

House Hunter, GitHub   July 2020 - August 2020

A site to allow users to search and favorite homes for sale in their desired location.

- Using React.js and Bootstrap, created site components that would successfully allow an user to search for home in a desired location. Moreover, it would let them filter the home by bedrooms, bathrooms, and price.
- Implemented ability for users who created a profile to save favorited houses with MySql and Auth0 protection.
- Using Zillow API integrated with Google Map API allowed users to search for homes nationwide not only returning a list of available homes, but pinning each homes location on google maps with the use of Axios.

EXPERIENCE

Addictive Desert Designs   **Mesa, AZ**

Frontend Engineer   March 2022 - November 2022

- Self taught how to integrate Frontend code with the Shopify E-commerce store to add extra features.
- Took initiative to streamline the process of adding additional product information so that anyone without coding knowledge could add or change product information through Shopify's interface.
- Maintain any changes that need to be done to products as well as adding new product pages to the site.
- Responsible for 3 company websites, along with the transition of newly acquired companies to Shopify.

EDUCATION

Lambda School, *Full Stack Web Development*   March 2021 - November 2021
